

# Accessing Information

**Mushiba:** The Universal Consciousness is like our local public library ~ because we are a resident of our town, we automatically receive a library card. Do we use our library card? If so, to what extent? Do we wander around the library becoming acquainted with its contents? Do we ask a librarian for assistance? Do we ask others for help in the library who appear to know how to do research?

In his class, *Guidelines for Growth*, Waith counseled:

**Waith:** *"The information in The Universal Consciousness that The Angelics have access to is available to everyone. The inability to access that information occurs because many entities simply have not developed their skills to do so."*

Learning our way around a library takes time, practice and patience ~ so too does our ability to access The Universal Consciousness. *Accessing Information* means having patience with Self!
