

Over Thirty Years With Waith ~ And, Counting!

Mushiba: From the beginning, Waith's message has been one of Respect, Love and Challenge. During his Class on the *Guidelines for Growth*, he said it most clearly:

Waith: *"We are not here to sugar coat anything. There are many on the plane who would present the easy way ~ the quick way ~ to gain enlightenment. They might say, 'In ten steps this is what you can do.' That approach is appropriate for certain audiences because they are at a particular point in their development where it is necessary for them to have steps and to have something concrete that they can measure, whether it is right or wrong as defined by someone else's standard ~ by someone else's frame of reference. That is not what we present."*

I would concur that Waith has not sugar coated anything! During the first ten years of his mission, Waith categorized his information as *the Search for Self ~ First Level*. Since 1997, he has concentrated on advanced information, referred to as the *Search for Self ~ Second Level*.
