

Creating A Circle Of Light

Mushiba: In 1990, Terra Lux began creating Circles of Light. Some of the circles were specific for a particular person or event, or more general in nature. Here is Waith's guidance on Creating a Circle of Light:

Waith: *“Creating a Circle of Light, by a group or one person, is easy and with a quick mental imagery, you can send Light to that image. For example, you could place an image of the planet, and within the planet you could place the image of a land or water mass and send Light to that particular image simply by envisioning White Light sprinkling over that image.*

“You can also place the image of a person who has either asked directly for the White Light or you feel would benefit by having White Light presented, knowing, of course, that you cannot impose the Light on another ~ only present the Light and allow the person to take what is wanted.

“You can also create a pool of White Light by envisioning something as simple as a swimming pool in which you fill it with the White Light ~ it

being open to any who would need to draw upon it and knowing that it was available, for if you truly send this out to The Universe, The Circle is now known.

“You need not go into a focusing or altered state to form any version of what we have given you for creating a Circle of Light.”

We have taken our lead from Waith, and based on his guidance, created a page on our website: *How To Create Your Own Circle of Light.*
