

Spiritual Leadership Series ~ Harmony Within Disharmony

Mushiba: Each day, it seems that there is more ~ and new types of ~ upheaval in both our individual and global life. Yet, even though some are living *in* the conflict, they are not *of* the conflict. How can that be? Waith explains this supposed conflict as *Harmony Within Disharmony*:

Waith: *“The earth plane is a training ground of disharmony and what you try to do is become harmonious within the disharmonious.”*

Question: *“Because the Self comes in within different incarnations to learn lessons, can we sometimes be experiencing something in the concrete that the Soul’s been working on for a long time ~ different patterns of experiences come up again and again?”*

Waith: *“Yes. The same layer of Self does not always come into the concrete. There are some layers that have never been in the concrete of Self and there are some layers of Self that come and go.*

“As one level learns something, it retreats into Self and another level comes in and learns something ~ retreats into Self, talks with the level that was just in, hopefully communicating, sharing information. It is a way in which the levels can learn to live with each other.

“When a higher level actually infuses, there is no longer the need to have that line of communication. That higher level brings in all of the understandings that the other lower levels have gone through in their experiences ~ it is part of the consciousness, and also part of the Soul memory.”

Achieving *Harmony within Disharmony* begins with Self and our ability to Connect With Self ~ little step by little steps. There is no need to compare and contrast ourselves with others because we are all teachers and learners. The Universe sets up (along with Self’s Soul) the appropriate little step by little steps, and as we walk our path, it will be easier if we ***Focus on Lightheartedness and the Spreading of Light!***

Question to Ponder: What role is played by our Sparks and Spots in helping to achieve Harmony Within Disharmony?
